for this engine is diesel, using an indirect fuel injection system. Drilling and stroke measures 4,057 inches and 3,385 inches, respectively. Compression ratio of this diesel engine 22.5:1. It has a four-speed automatic transmission. It uses a chain-driven single-bearing camshaft. The 1979 Sierra had a wheelbase extension to have a short wheelbase of 117.5 inches and a long wheelbase of 131.5 inches. There was also the option of a super-long wheelbase of 164.5 inches. The grid of the sierra has also been modified. It looked like the previous grid, except that the parking lights were now incorporated into the façade of the headlights in front of the grid. There was also the introduction of the fifth color option, known as oysters, to those that already exist. Existing.
